Office Action Summary

Application No.

09/083,278

Applicant(s)

FUJIWARA ET AL.

Examiner

Brian A Zimmerman

Art Unit

2635

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 December 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 3-6 and 8-25 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 3-6, 8-25 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____
- 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

EXAMINER'S RESPONSE

Status of Application

In response to the applicant's amendment received on 12/23/02 and entered upon filing of the RCE 2/3/03. The examiner has considered the new presentation of claims and applicant arguments in view of the disclosure and the present state of the prior art. And it is the examiner's position that claims 3-6,8-25 are unpatentable for the reasons set forth in this office action:

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Double Patenting

1. Claims 18 and 22 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 17 and 21 (respectively). When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Applicant is advised that should claims 17 and 21 be found allowable, claims 18 and 22 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after

Art Unit: 2635

allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claim Rejections - 35 USC § 103

2. Claims 11,12,14,15,20,23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over the WO publication to Motorola (WO 96/06417, hereafter referred to as the Motorola Publication) in view of Wong (5394140).

The Motorola publication shows a pager, which receives codes. A first portion of a received code is compared to a stored address to detect if the message is directed to the particular paging receiver, page 4 lines 20+. A second portion of the codes is used to convey display information to the user (page 4 lines 34+), and a third portion of the codes is used to activate a sound generator to audibly generate recalled tones to be heard by the user for presenting an audible composition to the user (page 4 lines 35+). It remains the examiner's position that the Motorola Publication does generate a series of tones where at least one tone has a frequency that is at least a portion of the chromatic scale. The chromatic scale is a series of notes or tones that can be used to generate or write an audible composition. It remains the examiner's position that the Motorola Publication would in fact generate at least one tone that would exist on the Chromatic Scale.

In the alternative, it is well known that the chromatic scale is a group of notes that can be used to create music or an audible composition much like the various forms of the English Language. Similarly, it is clear the a musical or audible composition for

alerting would have been obvious in view of the Motorola Publication regardless of the exact notes or the exact manner in which to express or "write" those notes. Therefore, it would have been obvious to use musical notes from different scales in the audible generated composition since such would have been common techniques to use different notes to generate a composition.

In an analogous art, Wong shows a pager, which generates audible messages in response to received message codes that are interpreted in view of stored corresponding codes. Wong shows displaying the call back number on the display, col. 3 lines 54-55. Wong also shows associating the call back number with an audio tone in a table format. See abstract and figure 2. This permits the user to have some creative control over how the audible composition is presented. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to have used an input means on the pager in order to permit the user to creatively control the audible output of an composition discussed in the Motorola document.

3. Claims 3-6,13,16-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Motorola Publication and Wong as applied to claims 11,14, above, and further in view of Fisch (4873520).

In an analogous art, Fisch shows voice message pager. The pager of Fisch uses voice as the audible composition, in order to convey addition information to the user upon retrieval or playing of the message. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to have used voice as the audible

composition in the above discusses system in order to convey additional information regarding the message.

4. Claims 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over the Motorola publication, Wong and Fisch as applied to claim 4 above, and further in view of Kawashima (5332994).

In an analogous art, Kawashima shows audible message pager. The pager of Kawashima uses the audible composition to convey addition information to the user. Kawashima uses a timer 12 to limit the time interval that the selected tone is generated; this provides protection to the power supply in that the audible generator does not drain the battery. It is also noted that stop commands are verily common in POCSAG systems. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to have used a timer to limit the audible composition in the above discusses system in order to prevent excessive battery drain.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Wong shows a pager, which generates audible messages in response to received message codes that are interpreted in view of stored corresponding codes. Wong shows displaying the call back number on the display, col. 3 lines 54-55. Wong

Art Unit: 2635

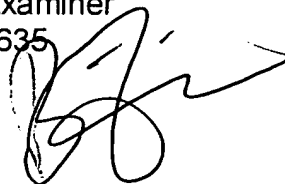

also shows associating the call back number with an audio tone in a table format. See abstract and figure 2.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian A Zimmerman whose telephone number is 703-305-4796. The examiner can normally be reached on Off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mike Horabik can be reached on 703-305-4704. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
